## STRUCTURE

Main structure: each leg has a base on the ground made of a tubular steel pipe 80x20mm, well shaped at the edge and drilled in the central part in order to allow the access of a vertical tubular pipe steel with an elliptical section 40 x 80 mm. This latter is equipped with two holes placed at the ends of the pipe and is completed with light grey plastic caps that allow the structure to be channelled vertically.

The leg is completed in the upper part with the 80x20mm tubular section fit for bear weight and drilled in accordance with the hole/bush set under the top.

In the lower part there are two adjustable height feet in plastic material.

The 80x40mm tubular steel beam fits with the leg shaft making a solid frame. Special slots are provided for horizontal electrification.

The side extension consists of a leg and a beam, as described above, which can fit into the beam of the desk.

The cables can be made to go up / down inside the leg, allowing the vertical passage of the cables. The upper section is of 52 cm and is in accordance with the width of the TOP; useful for all types of TOP size: desk (W.60.80 cm) and extension (W.60 cm).

## TOP

Is made of melamine chipboard 25 mm thick with ABS edge on its sides; equipped with bush on the inner part in order to be fixed to the structure. Desks could have a width of 80 or 60 cm and a length of 100-120-140-160-180-200 cm. Lateral side TOP is 60 cm width and could be 80-100-120 length.

## ACCESSORIES

Modesty Panel made of melamine chipboard; a frontal panel separator and a reception shelf with bracket.

## NOTE

We can make meeting tables with a pipe leg and squared base on the ground; single TOP could be: round (Diam. 80/100/120), squared (120x120) and rectangular (200/250 x 100). Placing 2 rectangular TOP on 3 great pipe legs, we can offer a rectangular meeting desk with a size of 300/400 x 120.
