

## METAL AND MELAMINE PEDESTALS

## METAL PEDESTAL ON WHEELS

Including a single-bloc steel plate shell, suitably folded, and welded. It is equipped with four spinning wheels of Ø50 at its base. The pedestal is available with three A6 drawers, or with one A4 size drawer and one A6 size drawer for holding suspended folders; the useful space inside the A6 drawer is cm 33x46x10.5. The drawer shell is designed to hold transversal separating elements. Drawers slide on simple thick steel printed plate extractable tracks, equipped with nylon coated metal ball bearings. The pedestal is equipped with a Yale type locker with a double foldable key for simultaneously locking all the drawers and with an anti-overturning safety device. Inside the drawer, it is possible to place some accessories, like a plastic stationery holder (for the A6 size drawer), a horizontal separating element (for the A6 size drawer) and folders of L.33 and H.25 cm (for the A4 size drawer). The structure is coated with epoxy polyester powders polymerized in an oven at 200°C, the drawer shell is painted in black.

## METAL PEDESTAL ON WHEELS WITH MELAMINE FRONTAL DRAWERS

Including a single bloc steel plate shell, suitably folded, and welded. The upper metal top finish has a radial front edge. On its base, it is equipped with four spinning wheels of Ø60. The pedestal is available with three A6 drawers, or with two A4 size drawers and one A6 size drawer; in both cases, a little stationary drawer with a plastic holder inside can be added. The drawer shell is designed to hold transversal separating elements. Drawer fronts are made of melamine of thickness 18 mm, each one of which is equipped with a silver plastic bow hand le. Drawers slide on simple thick steel printed plate extractable tracks, equipped with nylon coated metal ball bearings. The pedestal is equipped with a Yale type locker with a double foldable key for simultaneously locking all the drawers and with an anti-overturning safety device. Inside the drawer, it is possible to place some accessories, like a plastic stationery holder (for the A6 size drawer), a horizontal separating element (for the A6 size drawer) and folders of L.33 and H.25 cm (for the A4 size drawer). The structure is coated with epoxy polyester powders polymerized in an oven at 200°C.

## “MINI” METAL PEDESTAL ON WHEELS

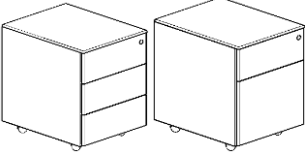

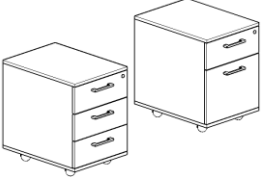

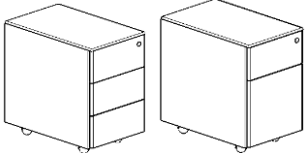

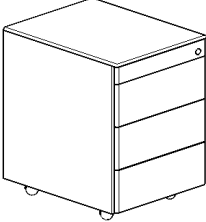

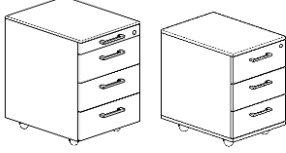

Including a single-bloc steel plate shell, suitably folded and welded. It is equipped with four spinning wheels of Ø50 at its base. The pedestal has three A4 size drawers, with a useful space inside each drawer of cm 24x46x10.5. The drawer shell (painted in black) is designed in order to hold transversal separating elements. Drawers slide on simple thick steel printed plate extractable tracks, equipped with nylon coated metal ball bearings. There are two alternative versions of this pedestal, namely with metal drawer fronts or melamine drawer fronts, of thickness 18 mm and with ABS edge. The pedestal is equipped with a Yale type locker with a double foldable key for simultaneously locking all the drawers and with an anti-overturning.

## MELAMINE PEDESTAL ON WHEELS

Made up of a grey or white melamine shell of thickness 18 mm; all the components (base, top, sides and back) are connected together. The pedestal has three A6 size drawers; drawers are silver colour, whereas melamine drawer fronts of thickness 18 mm are connected with the drawers themselves by means of paint. Drawers slide on simple extractable tracks, equipped with nylon coated metal ball bearings. Each drawer is equipped with a silver plastic bow-shaped handle. It is equipped with four spinning wheels of Ø50 at its base. The pedestal is equipped with a Yale type locker for simultaneously locking all the drawers and a foldable key for anti -accident purposes.
