

VENICE CABINET

FRAME

Built with melamine chipboard panels.

The structure has a depth of 45 cm, and heights of 82, 160 and 206 cm "excluding the finishing top". It is designed for hinge d doors and drawers, with lengths of 45, 90 cm; each height has been developed in such a way that each space is suitable for h 35 cm dox binders.

The unit frame rests directly on 5 plastic levelling feet. The frame's "sides, bottom, top and back panel" are made of 18 mm thick melamine chipboard panels, with ABS edging profile.

The partition provided in containers with heights of 160 and 206 cm is made of 25 mm thick melamine chipboard panels, with ABS edging profile. The structure is easy to assemble with eccentric joints.

The internal, ABS profiled 25 mm thick melamine chipboard shelves are supported by 4 shelf supports - adjustable to different heights in special, pitch 32 holes provided in the sides.

DOORS AND DRAWERS

Doors available in 3 versions:

- Solid doors with locks, made of 18 mm thick melamine chipboard with ABS edge profiles.
- Doors in transparent tinted tempered glass, 5 mm thick, ground to a polished edge all along the perimeter, with locks.
- Doors with anodised aluminium frame and 4 mm thick tempered glass, tinted or etched finish.

The doors with aluminium frames are not designed with locks (optional).

The doors can open to a maximum angle of 110°, the locks are YALE type, closing on the horizontal partition for the heights 160 and 206 cm and on the top side for heights 82 and 160 cm. Locks are equipped with double folding keys.

The handles are available in silver-coloured plastic, and in polished or satin-finished metal as options.

Filing drawers: complete with front panels made of 18 mm thick melamine chipboard, with YALE type locks.

The front panels are fixed to a metal frame with fully extensible guides on bearings. The frame is designed to contain suspended folders with 330 mm and 390 mm centre distances using special adjustable rods. The frames are painted with RAL 9006 epoxy-polyester powder coating.

ACCESSORIES

Cabinets can be completed with wraparound top finishing panels and finishing sides in the same colours as the doors and drawer fronts.

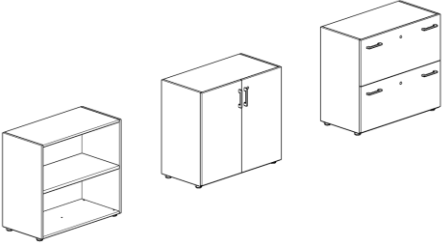

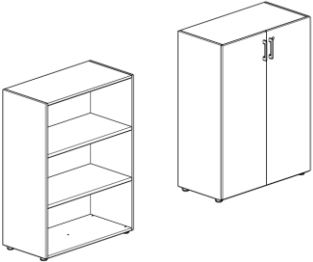

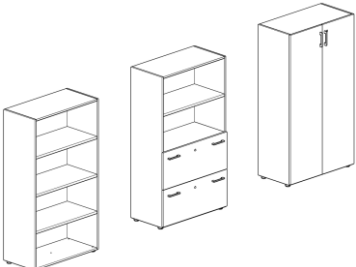

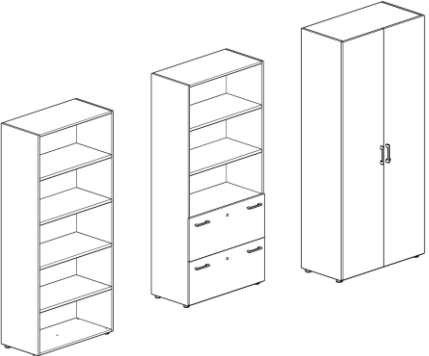

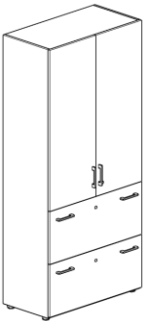

These accessories are used only to ensure that the cabinet matches the colour of the wood faced doors.

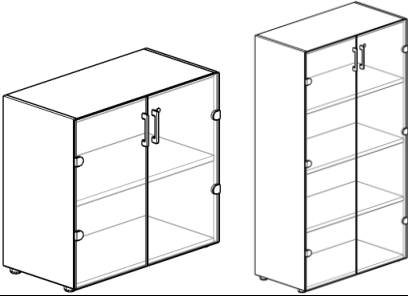

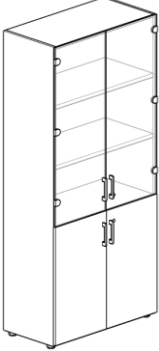

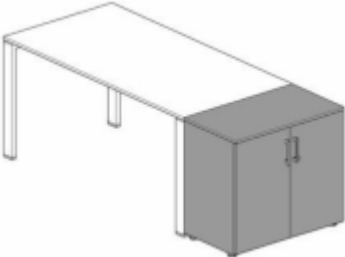

Top and side panels are made of 18 mm thick melamine chipboard panels, with ABS edging profile.

On request, the cabinets can be supplied with metal shelves with RAL 9006 epoxy-polyester powder coating finish; they are supported by the same shelf supports as the melamine shelves. The shelves are designed to accommodate suspended folders with a centre distance of 330 mm.

A cabinet is available with a width of 80 cm and a height of 74 cm, complete with a finishing top, to be matched to the desk line that we manufacture.
